Shinodroid Visual Asset Requirements for Canva

Global Style Guide for All Assets

text

BRAND COLORS TO USE:

- Primary Background: #0a0a0f (near-black)
- Secondary Background: #12121a
- Accent Purple: #7c3aed
- Accent Pink: #ec4899
- Accent Cyan: #06b6d4
- Text White: #e4e4ef
- Text Gray: #9ca3b0
- Success Green: #10b981
- Danger Red: #ef4444
- Warning Amber: #f59e0b

STYLE:

- Dark theme ONLY (no light backgrounds)
- Modern, clean, geometric
- Ninja / stealth / cyber aesthetic where appropriate
- NOT cartoonish – professional and sleek
- Subtle gradients, not flat blocks of color
- Think: Vercel + Linear + cybersecurity hybrid

ASSET 1: Hero Illustration

File: hero-illustration.png

Dimensions: 1200 × 800px (export at 2x → 2400 × 1600)

Used on: Landing page hero section

Canva AI Prompt:

text

Create a sleek futuristic isometric illustration on a transparent or very dark (#0a0a0f) background. Center an Android smartphone floating at a

slight angle. Overlaying the phone is a translucent glowing purple (#7c3aed) shield with a checkmark. Thin cyan (#06b6d4) scan lines sweep across the phone screen horizontally. Around the phone, small floating holographic icons orbit gently: a padlock, a bug silhouette, a warning triangle, a code bracket symbol "</>" , and a magnifying glass. These icons should be semi-transparent with soft glow effects. The overall style is dark cyberpunk-meets-enterprise – clean lines, minimal noise, high contrast glowing elements on dark. No text. Professional SaaS marketing illustration quality. Subtle purple-to-cyan gradient light beams emanating from behind the phone.

ASSET 2: How-It-Works Step Icons (3 icons)

Files: step-upload.png , step-analyze.png , step-report.png

Dimensions: 200 × 200px each (export at 2x → 400 × 400)

Used on: Landing page "How It Works" section

Canva AI Prompt — Step 1 (Upload):

text

Minimalist icon illustration on transparent background. A cloud shape in dark gray (#1e1e2e) with a subtle purple (#7c3aed) gradient glow along its edges. An upward arrow emerges from the cloud in bright purple (#7c3aed). Next to the arrow, a small file icon labeled ".apk" floats upward with a trail of glowing purple particles. Style: clean line art with gradient fills, cybersecurity theme, dark aesthetic. No background. 200x200 pixels.

Canva AI Prompt — Step 2 (Analyze):

text

Minimalist icon illustration on transparent background. A magnifying glass with a purple (#7c3aed) to cyan (#06b6d4) gradient handle. Through the lens, abstract code lines are visible with some highlighted in red (#ef4444) indicating detected issues. Thin scan lines radiate outward from the magnifying glass. Style: clean line art with gradient fills, cybersecurity scanning theme, dark aesthetic. No background. 200x200 pixels.

Canva AI Prompt — Step 3 (Report):

text

Minimalist icon illustration on transparent background. A document/report page in dark gray (#1e1e2e) with a green (#10b981) shield checkmark overlay in the top-right corner. The document shows abstract horizontal lines representing text and a small bar chart at the bottom in purple (#7c3aed) and cyan (#06b6d4). A subtle glow emanates from the checkmark. Style: clean line art with gradient fills, security report theme, dark aesthetic. No background. 200x200 pixels.

ASSET 3: Empty State Illustration

File: empty-state.png

Dimensions: 400 × 300px (export at 2x → 800 × 600)

Used on: Dashboard (no scans), Scan History (no scans)

Canva AI Prompt:

text

A friendly, minimal illustration on a transparent background. A stylized ninja character (simple geometric shapes, not detailed) wearing dark clothes with purple (#7c3aed) accent on the mask/headband. The ninja holds a large magnifying glass and looks toward an empty space with a subtle question mark floating. The character stands on a minimal platform line. Around the character, faded outlines of a shield, a phone, and a document float as ghost shapes (very subtle, 15% opacity). Overall feeling: friendly, inviting, "let's get started." Dark theme, minimal detail, SaaS product empty state style. NOT cartoonish – refined and geometric.

ASSET 4: Error State Illustration

File: error-state.png

Dimensions: 400 × 300px (export at 2x → 800 × 600)

Used on: Scan detail page (failed state)

Canva AI Prompt:

text

A minimal illustration on a transparent background. A stylized geometric ninja character looking puzzled at a cracked shield. The shield has a crack down the middle with subtle red (#ef4444) glow emanating from the crack. Small abstract warning triangles float around in amber (#f59e0b) at low opacity. The character has a tilted head expressing confusion. Style: same geometric ninja character as other illustrations. Dark theme, flat minimal with subtle gradients. Conveys: "something went wrong, but it's okay." NOT scary or alarming – approachable.

ASSET 5: Success State Illustration

File: success-state.png

Dimensions: 400 × 300px (export at 2x → 800 × 600)

Used on: After scan completes (briefly before showing report), future onboarding

Canva AI Prompt:

text

A minimal illustration on a transparent background. The same stylized geometric ninja character standing confidently next to a large shield with a bright green (#10b981) checkmark. Subtle sparkle/star shapes float around in green and purple (#7c3aed) at low opacity, suggesting completion and celebration. The character has a confident pose (arms crossed or thumbs up). Style: geometric, minimal, consistent with other illustrations. Dark theme. Conveys: "mission accomplished, your app is analyzed."

ASSET 6: Auth Side Panel Background

File: auth-bg-pattern.png

Dimensions: 800 × 1080px (export at 2x → 1600 × 2160)

Used on: Login/Signup left panel background

Canva AI Prompt:

text

Create an abstract geometric pattern for a dark background panel. Base color: very dark blue-black (#0a0a0f). The pattern consists of subtle

interconnected hexagonal grid lines in dark purple (#7c3aed at 8% opacity). Scattered along the grid intersections are tiny security icons: locks, shields, keys, code brackets – all at 5–10% opacity, creating a subtle texture. A radial gradient of purple (#7c3aed) at 10% opacity emanates from the center-left. A few floating geometric shapes (triangles, circles) in cyan (#06b6d4) at 5% opacity add depth. Overall: extremely subtle, sophisticated, not busy. It should look like a premium dark wallpaper with a security technology theme. Tileable or single composition at 800x1080 pixels.

ASSET 7: Feature Section Icons (8 icons)

Files: feat-static.png , feat-dynamic.png , feat-ai.png , feat-owasp.png , feat-checks.png , feat-export.png , feat-permissions.png , feat-firebase.png

Dimensions: 120 × 120px each (export at 2x → 240 × 240)

Used on: Landing page features bento grid, documentation

Master Canva AI Prompt (adapt per icon):

text

Minimalist icon on transparent background. [SPECIFIC DESCRIPTION BELOW]. Style: outlined with subtle gradient fill from purple (#7c3aed) to cyan (#06b6d4). Stroke width: 2px. Clean geometric shapes. Dark theme optimized (will be placed on dark backgrounds). No background circle or badge – just the icon itself. 120x120 pixels.

Specific descriptions:

1. **Static Analysis:** A magnifying glass over a document with code lines
2. **Dynamic Analysis:** A lightning bolt inside a phone screen outline
3. **AI Reports:** A brain/neural network icon with document lines
4. **OWASP Top 10:** A shield with "10" inside it
5. **50+ Checks:** A checklist with checkmarks and a number "50+" badge
6. **Export & Share:** A download arrow over a document with share nodes
7. **Permission Audit:** A grid of toggle switches with warning indicators
8. **Firebase Check:** A flame icon with a shield overlay

ASSET 8: Trust/Compliance Badges (3 badges)

Files: badge-encrypted.png , badge-noshare.png , badge-owasp.png

Dimensions: 300 × 80px each (export at 2x → 600 × 160)

Used on: Upload page trust section, landing page

Canva AI Prompt — Badge 1 (Encrypted):

text

A professional trust badge/seal design. Rectangular with rounded corners, dark background (#181825) with subtle border (#2a2a3a). Left side: a small lock icon in green (#10b981). Right side: text "APK Encrypted & Deleted After Analysis" in light gray (#e4e4ef) at 12px equivalent size. Style: clean, corporate trust badge similar to Norton Secured or McAfee badges but modern and dark-themed. 300x80 pixels.

Canva AI Prompt — Badge 2 (No Share):

text

Same style as Badge 1. Left icon: a prohibition sign / "no" symbol in purple (#7c3aed). Text: "We Never Share or Distribute Your APK." Same dark background and border treatment. 300x80 pixels.

Canva AI Prompt — Badge 3 (OWASP):

text

Same style as Badge 1. Left icon: a shield with checkmark in blue (#3b82f6). Text: "OWASP Mobile Top 10 Compliant Checks." Same dark background and border treatment. 300x80 pixels.

ASSET 9: Open Graph / Social Sharing Image

File: og-image.png

Dimensions: 1200 × 630px (standard OG size, no 2x needed)

Used on: <meta property="og:image"> , Twitter/LinkedIn/Slack previews

Canva AI Prompt:

text

Social media preview card design on dark background (#0a0a0f). Layout:

Left 60%:

- "Shinodroid" in large bold white text with subtle purple glow
- Below: "AI-Powered Android Security Analysis" in gray (#9ca3b0)
- Below: "by WORMHOLE Security" in smaller gray text
- A thin horizontal line accent in purple gradient

Right 40%:

- The phone + shield illustration from the hero (smaller version)
- Subtle purple gradient glow behind it

Bottom strip: Very subtle grid pattern at 3% opacity

Overall: Clean, professional, immediately communicates "security product" at thumbnail size. High contrast text for readability at small sizes. 1200x630 pixels.

ASSET 10: Favicon Set

Files: favicon-16.png, favicon-32.png, apple-touch-icon-180.png, favicon.svg

Dimensions: 16×16, 32×32, 180×180, SVG

Used on: Browser tab, bookmarks, iOS home screen

Canva AI Prompt (for 180px, then downscale):

text

App icon design for "Shinodroid" security product. A minimal geometric shield shape on a dark (#12121a) background with rounded corners (for app icon shape). The shield has a subtle purple (#7c3aed) to pink (#ec4899) gradient. Inside the shield: a stylized "S" letter mark OR a ninja shuriken (throwing star) silhouette in white (#e4e4ef). Keep it EXTREMELY simple – must be recognizable at 16x16 pixels. No fine details. Bold, iconic, geometric. 180x180 pixels.

ASSET 11: Logo Variations

Files: logo-horizontal.svg, logo-stacked.svg, logo-icon.svg, logo-horizontal-white.svg

Dimensions: Various (SVG preferred for scalability)

Used on: Navbar, footer, auth panel, marketing materials

Canva AI Prompt — Full Horizontal Logo:

text

Logo design for "Shinodroid" by WORMHOLE Security.

Left: Icon mark – the same shield+shuriken (or shield+S) from the favicon, colored with purple (#7c3aed) to pink (#ec4899) gradient.

Right: "Shinodroid" in clean sans-serif font (similar to Inter Bold), white (#e4e4ef) color. Tracking: slightly tight (-0.02em).

Below "Shinodroid" (optional, for full version only): "by WORMHOLE Security" in smaller gray (#6b7280) text.

Transparent background. Horizontal layout. Must work at 120px wide minimum. Clean, modern, tech SaaS logo style.

Variations to create:

1. Horizontal (icon + wordmark) — for navbar
2. Stacked (icon above wordmark) — for auth panel, footer
3. Icon only — for favicon, collapsed sidebar, mobile
4. All-white version — for dark gradient backgrounds
5. Monochrome versions for print/formal use

Asset Delivery Checklist

text

EXPORT SPECIFICATIONS:

- ☐ All PNGs exported at 2x resolution (retina)
- ☐ All PNGs have transparent backgrounds (except OG image)
- ☐ Logo provided as SVG (vector) in addition to PNG
- ☐ Favicon provided in all three sizes + SVG
- ☐ All files use kebab-case naming: hero-illustration@2x.png
- ☐ Organized in folder structure:

public/

```

Next Steps After Asset Creation

1. **Import into Next.js:** Use `next/image` for all raster images with proper `width`, `height`, and `alt` attributes
2. **SVG logos:** Import as React components or use `next/image` with SVG
3. **Favicon:** Update `src/app/layout.tsx` metadata to reference new favicon files

4. **OG Image:** Add to metadata in `layout.tsx`:

React

```
export const metadata = {  
  openGraph: {  
    images: ['/og-image.png'],  
  },  
}
```
